EXPERIENCE

DRINKS, Los Angeles, CA — Full Stack Software Engineer & Team Lead

February 2020 - Present

- Developed features on multiple ecommerce storefronts and API by following best practices in Ruby on Rails, React, GraphQL, SQL, JavaScript, and Docker
- Took ownership of API by handling deployments via AWS, creating tickets on Jira for scalability, and being the source of truth for code reviews on GitHub
- Introduced Postman Integration tests as an integral part of the development process regarding the API for added confidence and observability along with better CI/CD practices for efficiency
- Promoted to team lead after two years of mentoring junior engineers and now manage members of the team by delegating tasks, providing support whenever needed and aiding in their career trajectory

Lexonet, Inc., Anaheim, CA — Systems Engineer / Web Developer

September 2018 - February 2020

- Completed testing on newly developed software for high performance and minimal errors
- Communicated between clients and developers via Basecamp and Asana
- Initiated development of SaaS using Ruby on Rails and React for pharmacists in the UK to handle communication and repeat medications
- Code Reviewed and added unit tests via Rspec to team members pull requests to ensure high functionality

Thales Group, Irvine, CA — Junior Software Engineer

September 2018 - September 2019

- Aided in development for new version of internal software for airline technicians and managers to monitor in-flight entertainment on aircrafts
- Managed multiple internal API routes and HTTP requests
- Led integration of Tailwind CSS to design UI with mobile-first mentality
